Work experience

Application Developer
Terveyden ja hyvinvoinnin laitos | 10/2023 - 06/2024

I developed and maintained the National Infectious Diseases Register as a part of a Scrum team. The core programming language I used was Java on top of the Spring framework with PostgreSQL as the database. The frontend was implemented with Typescript, Angular and Apache Freemarker. I also gained some experience in Server administration.

Software Testing Trainee
Trimble Solutions Oy | 05/2022 - 08/2023

I was part of the QA team developing and maintaining the internal testing framework. I mostly used C#, Vue, Javascript and the database was PostgreSQL. I gained experience in both manual testing of software and test automation. Additionally I developed a couple of tools in python to automate tasks for realease managment and I helped onboard a new Trainee to the team.

Education

Aalto University, Espoo | 2019-2025
Automation and Control Engineering, B.Sc. + M.Sc. in engineering
Minor: Computer Science (Completed)

Course credits: 224/300, Completed Bachelor's degree
GPA: 4.2/5

Mattlidens Gymnasium | 2016-2019
Finnish matriculation exam

Mathematics	Laudatur
Physics	Eximia cum laude approbatur
Chemistry	Eximia cum laude approbatur

Other

Driver's license
Hygiene pass

Language skills

Swedish	Mother tongue
Finnish	Mother tongue
English	Excellent
German	Basic knowledge

IT-Skills

C#	Java
Vue	GIT
Typescript	Python
Javascript	Postgres
Software testing	MS Office

Hobbies

PC-Gaming
Programming
Cross country skiing, walking and going to the gym
Active in the student union (Teknologföreningen)
